

Quality. Customer Service. Integrity.

In keeping up with the 21st Century we have not forgotten that Customer Service comes **First!** “Joe” Dickey Electric was built on the belief that customer satisfaction and high quality employees equal success. The qualities listed above are the reason why we are your trusted electrical contractor; and today, over 55 years later, we are still growing strong.

It all started in 1957...

“Joe” Dickey Electric consistently strives to improve our services to be the area’s most trusted and cost effective electrical contractor in the industry.

Founded in 1957 by Joe Dickey Jr., “Joe” Dickey Electric is a full-service electrical contractor whose service areas are typically North Eastern Ohio, Western Pennsylvania, and Northern West Virginia; but has extended services as far as California, Puerto Rico and even South Korea when needed by our customers. We take pride in the fact that we are **‘Everything Electrical’**.

While providing only the highest level of quality service, **we can do it all**, from changing the light bulb in your home, to building the High Voltage Substation at your facility.

Our Services Include:

24-Hour Emergency Services

It doesn’t matter how big or how small your Electrical Emergency is, **we respond!** Our mission is to provide solutions to our Customer’s Electrical Emergencies; and help get your home or business back to normal.

Our Company Phone (330) 549-3976 is answered 24 hours a day, 7 days a week. The Electrical Emergency is dispatched to a Project Manager who can get an Electrician to the Customer’s site immediately to help solve their problem. Day or night, weekday or weekend, and holidays, we are your Electrical Emergency Solution!

Commercial Services

From adding an outlet for a new workstation, to helping you build your new building; we can handle it all. We work with local architects, engineers, and general contractors as an integral part of the building’s success. We offer Design/Build services for your project which can help make sure your complete electrical needs are fulfilled; along with helping you budget while the design is developed.

Regardless if you need work done in your office, retail area, restaurant, hotel, car dealership, data center, or any other business; we provide the quality electrical service you need.

Healthcare Services

Healthcare facilities require the most reliable and high-quality electric service. “Joe” Dickey Electric will partner with your facility to provide the best possible patient care. We know how to interact with staff, patients, and how to get the project completed without taking the focus away from patient care.

After a main power feeder failure at a local hospital, our Electricians and Project Managers helped resolve what could have been a catastrophic power loss for patients and doctors. We were able to provide temporary power for the entire hospital within hours, and we were able to remove and replace the entire power feeder and restore full electric service within days. This incredible act of emergency service was all thanks to our dedicated electricians/staff working around the clock until the issue was resolved.

Industrial/Automotive Services

“Joe” Dickey Electric provides complete Industrial/Automotive Electrical Services too many of the country’s leading manufactures. From installing a new Electrical Feeder, wiring the Controls on your Equipment, relocating your equipment to another part of the country, to building the Substation to Power your Facility; we can do it. We work in many different types of industrial industries including: Steel Production, Automotive, Manufacturing, Equipment Fabrication and many others.

We know how to respond quickly and efficiently to work within a tight schedule as to not adversely impact production. We have the expertise, equipment, and know how to work safely in your facility while getting the project completed, regardless of the timeframe or manpower requirements.

Residential Services

Our Residential Electrical Service extends to, but is not limited to, fixing a broken light, adding an outlet, upgrading your electrical service, to helping you build your new home; we are here to make your dream a reality. Our Residential Electricians have the expertise to work on your projects and answer all of your home electrical questions.

Our 24-hour Emergency Service also extends to your residential needs. “Joe” Dickey Electric knows how to provide you the quality service you deserve.

Preventative Maintenance Services

At “Joe” Dickey Electric, we know how expensive your Electrical Assets are. Our goal is to find the electrical issues before they cause an outage, or damage to your equipment, resulting in extensive cost.

Routine Preventative Maintenance is as simple as, tightening electrical connections that loosen over time. Loose connections cause heating issues that will result in a failure to your electrical system or equipment. Infrared/Ultrasonic Testing completed by our highly trained electrical technicians, will locate heating issues. Once tests are completed, an analysis of your electrical system along with solutions will be provided. “Joe” Dickey Electric’s knowledge and use of technology will ensure that your Electrical Assets are properly maintained or repaired. Without proper preventative maintenance, potential issues could result in a complete loss of power to your facility.

Green Technologies

The environment is very important to us at “Joe” Dickey Electric. We are able to utilize and implement many Green Technologies into your home and business. Green Technologies include Solar, Wind, LED Lighting, Occupancy Sensors, Day-Light Harvesting Systems, Energy Management Systems, and many more. Just recently we have completed Lighting Efficiency Retrofits along with a 451kW Solar Array for local businesses.

We pride ourselves on staying current with changing technologies to ensure we provide the most current and cost efficient services to our customers.

Safety

Safety in the workplace is a way of life at “Joe” Dickey Electric. We are fully licensed and bonded to ensure our customer’s peace of mind. The safety of people and property are our first priority.

Our Philosophy

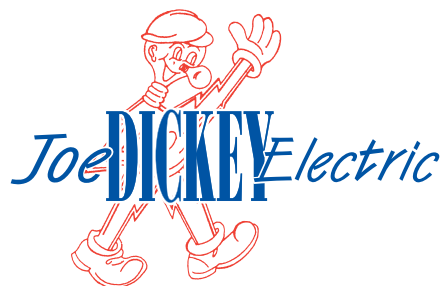

Our philosophy is simple: **The Customers’ Needs Come First!** Our employees are highly trained electricians and customer service experts here to meet all of your electrical needs.

And in the words of Joe Dickey Jr. himself:

“You’ve Tried The Rest, Now Try The Best!”

When customers’ call “Joe” Dickey Electric for their Electrical Needs, they are not only calling the highest quality company of professionals, but they are calling a company that cares and listens to their needs.
